

## INTERNET SERVICE PROVIDER CALLBACK FOR SATELLITE SYSTEMS

### ABSTRACT OF THE DISCLOSURE

A method, apparatus, article of manufacture, and a memory structure for  
5 delivering purchase information comprising storing purchase information for a purchase  
of a user in a set top box, wherein the set top box is configured to receive broadcast  
signals through a tuner; and enable a presentation device connected to the set top box to  
display the broadcast signals; automatically obtaining a connection to the Internet or a  
data paging network using a communication module of the set top box without the user  
10 requesting the connection, wherein the communication module is different than the tuner;  
establishing a secure electronic connection with a server through the connection to the  
Internet or data paging network; and transmitting the purchase information from the set  
top box through the secure electronic connection to the server.
